

CURRICULUM VITAE

RICHARD L. BOWEN, M.D.

570 Long Point Rd., Suite 150

Mt. Pleasant, SC 29464

Richard.bowen@yahoo.com

EDUCATION:

1979 BS University of South Carolina, Columbia, S.C.

1985 M.D. Medical University of South Carolina, Charleston, S.C.

1988 Family Medicine Residency, Spartanburg Regional Medical Center, S.C.

BOARD CERTIFICATION:

American Board of Family Medicine 1988

PRACTICE/EMPLOYMENT HISTORY:

03-14 to present Private Practice

07-11 to 01-15 Health First Charleston, SC

01-10 to 6-11 Duke Primary Care

11-08 to 01-10 Clinical Physician Next Care Garner

08-07 to 11-08 Clinical Physician Health First Urgent Care

01-07 to 08-07 Medical Director Bonita Urgent Care

03-01 to 12-05

Founder & Chief Medical Officer, Voyager Pharmaceutical Corp.

04-95 to 03-01

Outpatient practice specializing in the treatment of metabolic syndrome and diabetes

07-91 to 04-95

Hospital Based Family Practice

10-89 to 7-91

Naples Community & North Collier Hospital Emergency Dept Physician

07-88 to 10-89

Brooksville Regional Medical Center, Emergency Dept. Physician

POSITIONS HELD:

7/15 to 7/17 Clinical Assistant Professor, Dept. of Psychiatry, MUSC

7/93-7/94 Chairman Critical Care Committee N. Collier Hospital

7/94-4/95 Vice Chairman Department of Medicine, N. Collier Hospital

7/90-4/95 Medical Director Bentley Village Skilled Nursing Facility

Full Length Papers:

Clinical Trial Experience

- C1. Principle investigator for "Echocardiographic assessment of Patients receiving Long-Term Treatment with Anorexiants Medications" Over 150 subjects were enrolled over a 6 month period. Subjects were seen monthly for 12 months and underwent cardiac ultrasound at baseline and every three months thereafter. The study was sponsored by Wyeth at the insistence of the FDA after data I submitted to MedWatch resulted in fenfluramine being removed from the market due to cardiac valvulopathy. 1998-1999.
- C2. Principle investigator for "An Association of Elevated Serum Gonadotropin Concentrations and Alzheimer Disease?" Sixty Nine patients were recruited to provide blood samples in order to compare serum gonadotropin concentrations in patient's with dementia vs. age-matched controls.
- C3. Principle investigator for "A clinical study of lupron depot in the treatment of women with Alzheimer's disease: preservation of cognitive function in patients taking an acetylcholinesterase inhibitor and treated with high dose lupron over 48 weeks." One hundred two subjects were recruited over a nine month period at five sites.

Patents and Patent Applications

- P1 Methods for preventing and treating Alzheimer's disease. United States Patent 6,242,421 Issued: June 5, 2001
- P2 Methods for slowing senescence and treating and preventing diseases associated with senescence Serial No. 321579 Filed: December 18, 2002 (This patent will likely be divided into numerous individual patents)
- P3 Methods for treating and preventing excessive appetite Filed: 11-08
